EXPERIENCE

HAVEN TECH

Frontend Developer
2021 - 2023

CREDIT KARMA

Software Engineer
2021 (Contract)

PROBE POINT

Digital Media Manger
2019 - 2020

PUBLISHERS CLEARING HOUSE

Sr. Web Designer
2013 - 2019

2021-2023

Haven Technologies

FRONTEND DEVELOPER • NEW YORK, NY

Developed and deployed SPA components using HTML5/CSS3, Docker, Angular, and TypeScript, ensuring consistent runtime environments and seamless UI designs

Utilized open-source tools, frameworks, and Storybook for interactive component development, testing, and maintainability

Collaborated with design team to create reusable, accessible, and well-tested UI components within a structured in-house design system

Ensured code quality and functionality using Jest and adhered to WCAG 2.1 AA, ADA, and Accessibility standards for an optimal user experience

Worked on a frontend team responsible for maintaining and enhancing application performance, scalability, and overall user experience

Gained experience in full-stack development by working with backend technologies, enhancing the ability to design and implement end-to-end solutions for complex applications.

EDUCATION

WEB DEVELOPMENT

Johnson & Wales Univ.
2000-2003

VISUAL COMMUNICATIONS

American Inter Univ.
2009

FULL STACK DEV

CareerFoundry, 2021

EXPERIENCE CONTINUED

- 2021** ***Software Engineer*** CREDIT KARMA • CHARLOTTE, NC (REMOTE)
- Collaborated with the engineering team to address technical debt in a monolithic PHP framework, participating in site audits, optimizing search engine meta properties, and gaining hands-on experience with PostgreSQL in financial tech systems
 - Worked closely with the platform team to develop components of CK Containers, implementing GraphQL schemas for client-facing features and ensuring UI component consistency across the App
 - Assisted in upgrading the developer toolchain by transitioning from TSLint to ESLint, contributing to automated testing methodologies
 - Supported the establishment of a robust A/B testing infrastructure for fintech applications, focusing on optimizing user experiences while adhering to PHP framework and UI component standards
 - Contributed to open-source in-house libraries, preparing the ecosystem for JSX fragments, submitting pull requests, and maintaining compliance with UI component guidelines

- 2019-2020** ***Digital Media and Tech Manager*** PROBE POINT MEDIA • MELVILLE, NY
- Built and managed a department focused on designing and developing marketing campaigns through innovative mobile apps for local real estate companies, leveraging React JS for a seamless user experience
 - Executed a comprehensive rebranding across all channels, resulting in significant brand growth within the first few months following the relaunch
 - Substantially increased lead generation for the in-house sales team through strategic branding, web design, and online campaigns
 - Performed web development tasks, including template development, testing, debugging, integration, documentation, and deployment
 - Enhanced the company's online platform through website redesign, functionality upgrades, and targeted social media strategies

- 2013 - 2019** ***Senior Web Designer*** PUBLISHERS CLEARING HOUSE • JERICHO, NY
- Team lead for production, modification, and maintenance of specified website properties, and lead frontend developer for the company's first mobile native app, transitioning into full-stack development
 - Developed UI component library for in-house design systems, streamlining the design process and enhancing collaboration between web designers and engineers
 - Served as the full user experience designer for Android and iOS devices, contributing to an impressive yearly retention rate, while managing the company's social media creative presence and developing concepts that achieved notable growth in post engagement rate and CTR to main sites
 - Acted as the liaison between front-end and back-end development teams, ensuring seamless integration of user-centric designs and experiences, while expanding full-stack development skills
